Petty Cash Management

About Us

Don't

The Graphics Designers and Brand Manager say we must have this section. But we think it's boring!

1

Read,

However, we must listen. It's "Teamwork!" So, we kept the identity and graphics, but we changed the text!

2

SKIP!

Don't read, please skip to slide #4. Who cares about yesterday? It's all about tomorrow. This green guy is too fancy.

3

How it all begun?

Initial Spark

It all began with the daily grind and the persistent cycle of problematic routines, sparking a desire to find a better way. In 2014, the first business model was created, marking the start of our journey towards innovation.

Early Failure

In 2018, we developed a simple WordPress site, which unfortunately failed miserably. This setback provided invaluable lessons, refining our approach and strengthening our resolve to succeed.

SaaS Commitment

By 2020, we embraced the era of SaaS, dedicating over 2,659 hours to meticulously design user experiences and interfaces. This phase was marked by intense focus on creating a user-friendly and efficient system.

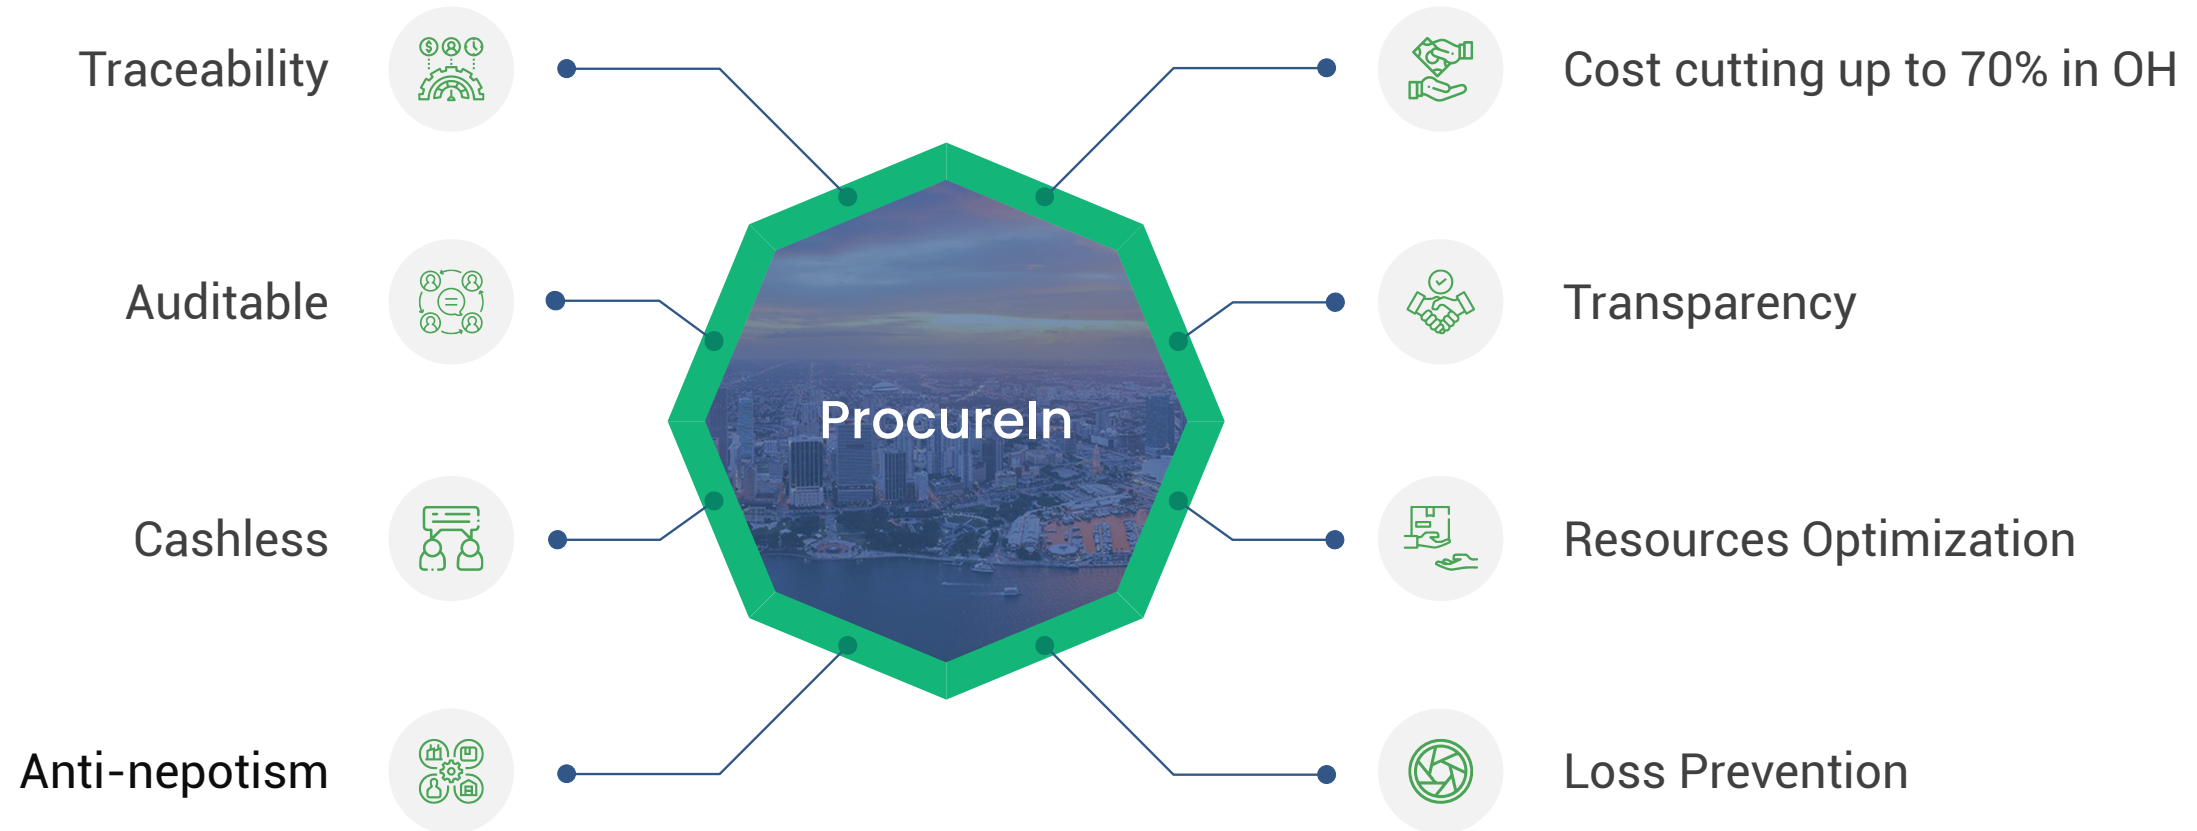

Successful Launch

In late 2023, we entered the pre-launch phase, investing an additional 1,869 hours in exhaustive testing. Finally, in March 2024, our hard work culminated in the official launch, marking the beginning of a new era of innovation and growth.

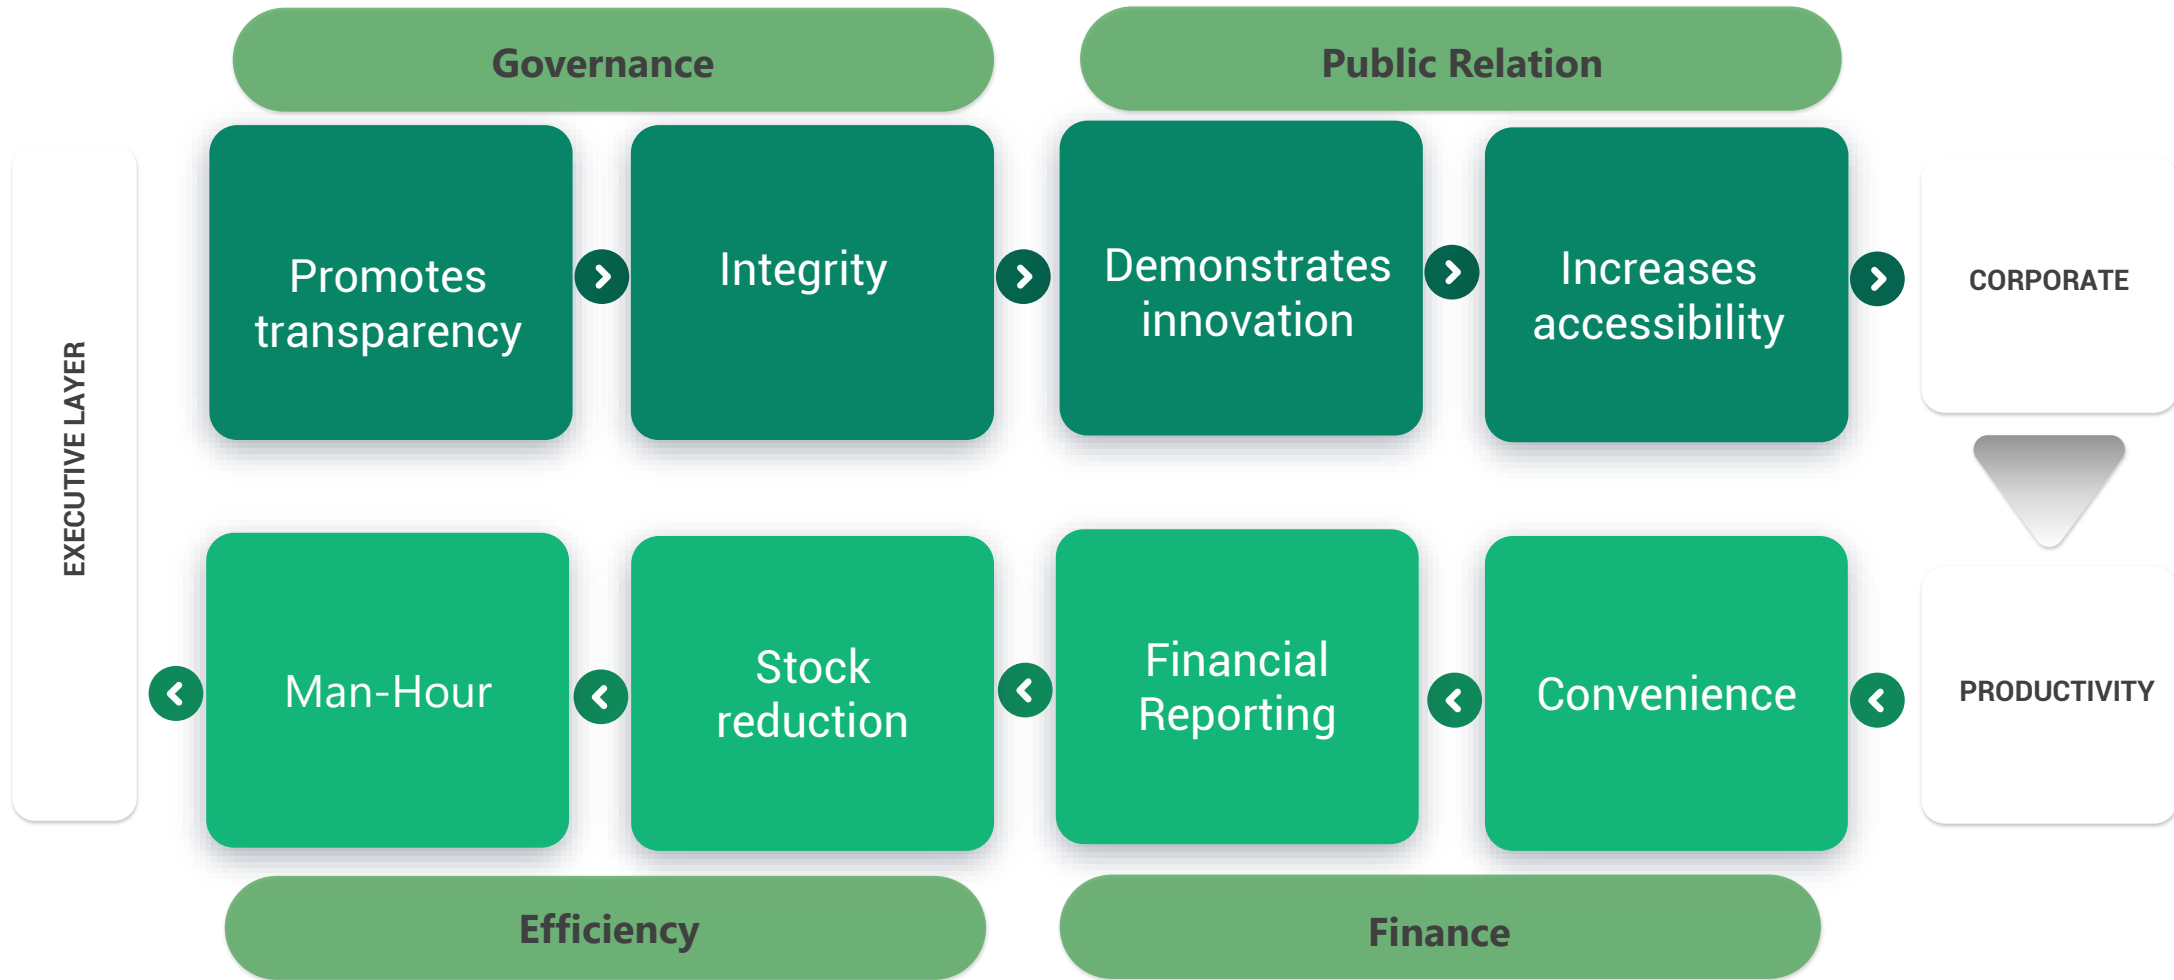

Please skip, it's BORING!

Powerful SaaS

The image shows a laptop displaying a SaaS application interface. The interface features a table with the following columns: PROJECT, AGREED AMOUNT, AGREED DEADLINE, BID STATUS, and PROJECT STATUS. The table contains 11 rows of data, each representing a project. The bid status is indicated by colored buttons: Pending (yellow), Awarded (green), Rejected (red), and CANCELED (red). The project status is also indicated by colored buttons: Open (blue), Awarded (yellow), and CANCELED (red). The laptop is a MacBook Pro, as indicated by the text at the bottom of the screen.

PROJECT	AGREED AMOUNT	AGREED DEADLINE	BID STATUS	PROJECT STATUS
HUAWEI MateBook X Pro	4	2024-08-17	Pending	Open
عرضة تيسرية - اليوم الوطني	4	2024-08-16	Pending	Awarded
محطة شحن جوالات	1	2024-06-07	Awarded	Awarded
Waiting seats	1	2024-05-31	Awarded	Awarded
Impact drill	1	2024-05-31	Awarded	Pending
Microsoft License Subscription	1	2024-05-23	Pending	Awarded
Oil scent	1	2024-05-23	Awarded	Awarded
صيانة كاميرات المراقبة	1	2024-05-23	Pending	Pending
صيانة كاميرات المراقبة	1	2023-10-07	Rejected	Pending
توريد نظارات للشركة	1	2023-10-05	Pending	CANCELED
فلاش جدران المكاتب	1	2023-09-08	Pending	CANCELED
تسجيل الرد الآلي الإحتراقي	1	2023-09-09	Pending	CANCELED

Case Study

Here is the revised, more readable version of the text: Company X often receives random requests such as impact drills, fume hood calibration, or Eid cakes. These requests are directed to the Procurement department, which primarily focuses on strategic sourcing. As a result, Procurement gets distracted and lacks the technical knowledge of the end-user's requirements. This frequently leads to delays and frustration for the end-user.

Problems:

1. All the issues mentioned previously. We didn't mention any. But sure, you can guess!
2. Invoices often do not meet ZATCA standards, causing frustration in the Finance department.
3. At year-end, tracking invoices is challenging as every 10-15 invoices are grouped into one JV.
4. Difficulty in extracting data instantly for miscellaneous purchases.
5. Miscellaneous purchases cannot be governed 100%.

All the above issues and more are resolved with ProcureIn.
